

L3FRM LED Frame Light

The L3FRM series redefines recessed commercial lighting by offering a modern and subdued lighting solution, all within a sleek and pre-assembled frame design. These innovative luminaires can elevate the look of a wide variety of applications such as offices, hospitality and retail spaces.

■ Color and Power Selectable

Innovative recessed luminaires with the ability to adapt to the colour temperature (3 000/3 500/4 000/5 000/6 500 K) and lumen output requirements for a variety of projects and applications. From commercial spaces to hotels, the L3FRM series can easily address the specific lighting needs of today's market.

■ Modern and Minimalistic

Grid ceilings are instantly elevated with the modern design of the L3FRM series. Its sleek profile and clean lines bring an architectural appearance to enhance the look of any application.

■ Easy Installation

The pre-assembled and lightweight aluminum frame construction is designed for a quick and efficient installation. No assembly or tile cutting required, a true time saver on the job site!

Features

- Frosted polycarbonate lens for a pleasant and glare-free illumination

- Lightweight and thin construction – only 1" thick!

- One piece frame design offers easy installation right out of the box
