

## SLIM KOLIKA LED ARCHITECTURAL LINEAR SUSPENDED

Sleek, high-performing, and fully customizable, SLIM KOLIKA is an architectural luminaire designed to meet the demands of the most refined commercial environments. Available in 2', 4', and 8' lengths, it integrates seamlessly into contemporary spaces such as museums, offices, and galleries—enhancing the architecture without overpowering it.

### ■ Color and Power Selectable

Each luminaire features integrated switches for selecting color temperature (3 000/3 500/4 000 K) and wattage directly on the installation. This luminaire gives you the flexibility to meet your needs.

### ■ Express your creativity

Add your personal and unique touch! Choose between the L, T, X, Y and 120° connectors for diverse design options. The row mounted bracket can also be added to create continuous rows of light, providing even more installation flexibility.

### ■ Create your own atmosphere

SLIM KOLIKA offers direct or direct/indirect lighting, allowing precise control over the percentage of light distributed upward and downward. This flexibility makes it ideal for creating balanced, functional, or immersive atmospheres, depending on the context.
