

SPW

SPECIAL WORDING OPTION

CUSTOM WORDING OR GRAPHIC IMAGE

BLACK OUT & WHITE OUT

CUSTOM COLOURS

The SPW special wording option can be used in a variety of applications. From ADA compliant signs to corporate logos, nearly any custom wording or graphic can be applied to an AimLite exit sign series.

FEATURES & SPECIFICATIONS

OPTIONS

- Special wording signs can be combined with additional options as applications require. The AC Flasher option will cause the sign to illuminate and then darken at a rate of about once per second. The black out option adds a opaque, dark panel over the special wording. The panel masks the special wording until the sign is illuminated, thereby preventing false notification of the sign's message. Similarly, the white out option places a white, opaque panel over the lettering to achieve the same result. All of these options are typically added to normally off signs only.

LIGHT SOURCE

- Typical special wording signs utilize LED light source. Special wording signs can utilize any combination of colours, contact AimLite with your specifications.

Data is based upon tests performed in a controlled environment. Actual performance can vary depending on operating conditions. All products are subject to change or may be discontinued any time without notice.
