■ Selectable color and power

The switch is directly placed on the back of the LED module to select from 3 color temperature (3 000/3 500/4 000 K) and 3 powers. Gives you more choice for your lighting projects and application.

■ 0-10 V dimming

0-10 V dimming system requires less energy and extends the life of the luminaire. 0-10 V dimming system is reliable and perfect light control for the ambience. It is compatible with the most common dimming systems.

■ Easy installation

The Universal Commercial downlight is perfect for new construction and retrofit solutions. Simply choose the desired color temperature and wattage, make the electrical connections and insert into the ceiling.
