

ARCHI 4" ARCHITECTURAL DOWNLIGHT

ARCHI is designed for both new construction (non-IC) and remodel applications across all commercial lighting applications. This high-output LED downlight offers exceptional versatility with accessories sold separately to customize the lighting to your specific needs.

■ Color and Power Selectable

ARCHI is available in 5 color temperature (2 700/3 000/3 500/4 000/5 000 K) and 3 power selectable, combining multiple lighting functions in a single fixture. It gives you more flexibility for your lighting projects and applications.

■ 0-10 V Dimming

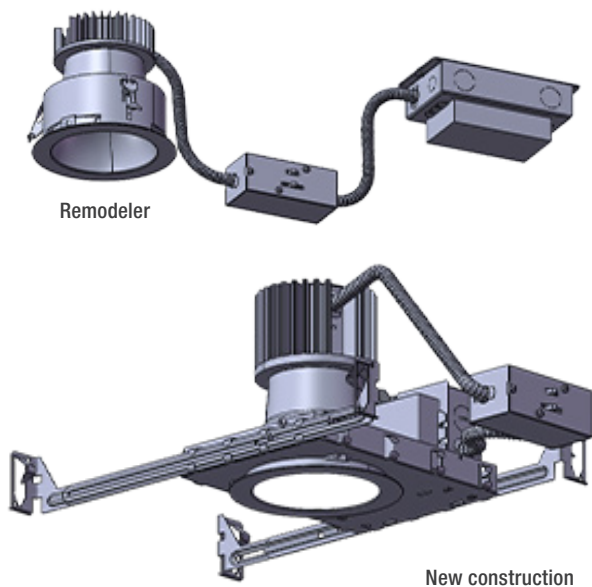

0-10 V dimming system requires less energy and extends the life of the luminaire. 0-10 V dimming system is reliable and perfect light control for the ambience. It is compatible with the most common dimming systems.

■ Two Installation Types

ARCHI is available with new construction and remodeler types for your project needs. The housing constructed of heavy duty galvanized steel with built-in thermal protection for high lumen performance.

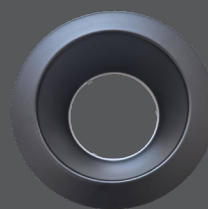

Regressed aperture designed for a sleek and glare free experience!

Customize your fixture with accessories! (sold separately)
